

Name _____ # _____

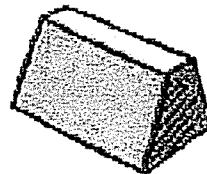

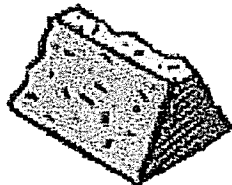

"The Dam Project"

1. What are the benefits of building a dam?

2. What are the negative effects of building a dam?

3. What are 4 types of dams? Label each dam below.

4. How did your team work together? (Don't use names)
Be specific about what was successful and what wasn't and why.

5. Draw a picture of your group's final dam design. What type of dam did you build? (see question 3) Label the materials used and include your accounting. (list of materials and cost of each)

6. How did your group's dam perform? Be specific.

7. What do you think was the design element that made your dam successful or what design element caused a failure?

8. How could your dam be improved if you were to build it again?
